

Williams Family Tree Wiki Updated

All technical stuff, this one! I have upgraded the scripts running the Williams Family Tree Wiki which meant I had to upgrade the version of PHP running the site. Everything appears to be ok but if you find anything not working as it should please let [me](#) know.

If you would like to add pages to the Wiki please take a look at the [main page](#) and the [help page](#). Also, I will have to create an account for you so you will need to send [me](#) your email address.

So, if you are feeling creative and would like to share your family anecdotes and pictures, please get Wiki-ing ...

Phil.
